<u>Fifth Week of Learning: November 12, 2019</u>

For this week we only had one meeting as the last meeting was advanced last week. The said meeting we check all the written activity and the remaining time was allotted to do our pending works. Also, it was the introduction to GitHub wherein we must organize and know its use as it is were our activities must also be seen aside from Trello. As of now, I know the basics of using GitHub and is working out on uploading my files there that was first uploaded in Trello.

In conclusion, the said meeting were a really help for me to work on my pending works and to know the basics in using GitHub and be used to it by at least duplicating my activities there.
